

Leonardo Velasco Ojeda

Mexico City, Mexico | 55 78577637 | leonardo.velasco.oj@gmail.com |
leoov.dev | github.com/LEO-OV

Professional Profile

Systems and Information Technology Engineering student with a focus on data analysis, applied artificial intelligence, report automation, and technology solution development. Skilled in SQL, Python, R, Excel, database design, exploratory data analysis, and data visualization. Experience in academic and freelance projects involving web development, information management, CRUD modules, user authentication, and database structuring. Interested in applying data and artificial intelligence tools to optimize processes, generate useful indicators, and support decision-making.

Education

Universidad Anáhuac México | *Systems and Information Technology Engineering* | 2022 – Present

Current GPA: 9.3/10.0.

Areas of focus: data analysis, databases, artificial intelligence, software development, and information technology.

Minor: Data Analysis with IT Tools.

Plantel Azteca | *Technical High School Diploma in Computing* | 2019 – 2022

Final GPA: 9.9/10.0 (Academic Excellen.

Experience

Freelance Web Developer | *Restaurant Management System Project* | 2024 – Present

- Designed and deployed a dynamic web solution using HTML, CSS, JavaScript, and PHP.
- Implemented a reusable component structure to improve maintainability and scalability.
- Designed interfaces focused on improving navigation, information presentation, and user experience.

Projects

Predictive Analysis with Hospital Data | *Academic Data Analysis and Machine Learning Project*

- Performed data cleaning, transformation, and exploratory data analysis using Python, R, and statistical techniques.
- Applied basic machine learning models for classification tasks and result evaluation.
- Worked with performance metrics, data visualization, and result interpretation to communicate relevant findings.
- Documented findings, assumptions, and model results in a structured academic report.

Certifications

- Google Data Analytics – Google (In progress)
- Network Security – Cisco (2026)
- Artificial Intelligence with Machine Learning in Java – English (2025)
- CCNAv7: Switching, Routing, and Wireless Essentials – Cisco (2023)
- CCNAv7: Introduction to Networks – Cisco (2023)
- Partner: NDG Linux Unhatched – Linux Professional Institute (2022)

Technical Skills

- Data and Analysis:** Excel, SQL, Python, R, data cleaning, data visualization, basic machine learning.
- Programming Languages:** Python, R, Java, C, C++.
- Web Development:** HTML, CSS, JavaScript, PHP, responsive design, web interfaces.
- Databases:** SQL, MongoDB, database design, queries, and information structuring.
- Tools and Infrastructure:** Git, GitHub, Linux, AWS, Office 365, Cisco Networking, generative AI.

Languages

Spanish: Native.

English: B2 Level (Fluent technical reading).
